Big data knows where you've been and who your friends are. It knows what you like and what makes you angry. It can predict what you'll buy, where you'll be the victim of crime and when you'll have a heart attack. Big data knows you better than you know yourself, or so it claims. But how well do you know big data?

If you need to look at many different data points, it may be a job for big data. Velocity matters because data tends to come in waves. This gets a little trickier because both small and big data needs can require constant refreshes. Generally, if you 're looking to accumulate, it 's big data. If you 're trying to stay up to date, it 's small data.
