Folding Techniques For Designers
All designers fold. That is, all designers
crease, pleat, bend, hem, gather, knot,
hinge, corrugate, drape, twist, furl,
crumple, collapse, wrinkle, facet, curve or
wrap two-dimensional sheets of material
and by these processes of folding, create
three-dimensional objects. These objects
will perhaps not be origami-like in
appearance, or the folding may only be a
detail, but most will nevertheless have
been folded - wholly or in part - in some
way.

Folding Techniques

Many designers use folding techniques in their work to make three-dimensional forms from two-dimensional sheets of fabric, cardboard, plastic, metal and many other materials. This unique book explains Page 3/12

the key techniques of folding, such as pleated surfaces, curved folding and crumpling. It has applications for architects, product designers, and jewellery and fashion designers An elegant, practical handbook, Folding for Designers explains over 70 techniques explained with clear step-by-step ...
