Handbook of Extemporaneous - kampoeng2013  
The extemporaneous preparation of medicines is associated with a number of potential risks to patients, healthcare staff and their organisation. These all need to be carefully considered in determining the best treatment option; they then need to be minimised when the use of this category of medicine is necessary.

Handbook of Extemporaneous Preparation

(PDF) Handbook of extemporaneous preparation  
Each monograph provides essential information such as: formula, method of preparation, risk assessment, stability, storage and references. The comprehensive list of references for each drug monograph, relating to stability data and in some cases bioavailability, provides the prescriber with evidence that a quality product is being prepared.

Handbook of extemporaneous preparation - Australian Prescriber  
The preparation of an unlicensed medicine (for example unlicensed methadone, or menthol in aqueous cream) in a pharmacy is called ' extemporaneous preparation '. The guidance should be read alongside the standards for registered pharmacies. These aim to create and maintain the right environment, both organisational and physical.

Guidance for registered pharmacies preparing unlicensed ...  
3. Extemporaneous preparations should be done based on evidence-based references. 4. Always check for the suitability of the product/brand for extemporaneous preparations. 5. Preparations listed in this manual should be done according to what is stated as far as possible unless stated otherwise in the product leaflet. 6.

Extemporaneous FORMULATION - pharmacy  
noun. ( Pharmaceutical: Administration) An extemporaneous preparation is a drug specially prepared by a pharmacist because an appropriate drug is not readily available. If no methadone is available, pharmacists can make an extemporaneous preparation using a specified formula.
