If you know the work of Pinker, Dawkins, Dennett, Wright and other writers who have expounded on the evidence that an innate, biological human nature is a real and tangible thing (as opposed to the concept of the "blank slate" put forth most famously by Skinner, Watkins and the behaviorists during the early part of the century), you should know the work of Edward O. Wilson, a man who was so far ahead of the now accepted modern decriers of the "tabula rasa" that his early work was deemed . . .
