Swinburne argues compellingly that the existence of the universe, its law-governed nature and fine-tuning, human consciousness and moral awareness, and evidence of miracles and religious experience, all taken together (and despite the occurrence of pain and suffering), make it likely that there is a God.

~~Amazon.com: The Existence of God (9780199271689) ...~~

Swinburne's argument for the existence of God. Richard Swinburne developed an argument that argued for the existence of God through religious experience as he argued 'on our total evidence, theism is more probable than not'. However he doesn't completely base his proof for god on religious experience but takes an accumulative approach as he also a number of other approaches such as the design argument and cosmological argument etc.

~~Swinburne's argument for the existence of God — Free ...~~

Abstract. This book assesses the worth of arguments for and against the existence of God. Evidence confirms (makes more probable) an explanatory hypothesis in so far as (1) given the hypothesis the evidence is to be expected, that is the hypothesis makes the evidence probable, (2) the evidence is not otherwise to be expected, (3) the hypothesis is simple, and (4) it fits with background knowledge (i.e., knowledge about how things behave in neighbouring fields of enquiry).

~~Existence of God — Oxford Scholarship~~

Richard Swinburne was born on the 26th December, 1934 in the United Kingdom. He is a British philosopher of religion who is also an Emeritus Professor of philosophy at the University of Oxford in England. Over the last 5 decades, Richard Swinburne has been an influential proponent of philosophical arguments of the existence of God.

~~Richard Swinburne's Philosophy Of The Existence Of God ...~~

The most general phenomenon that provides evidence for the existence of God is the existence of the physical universe for as long as it has existed (whether a finite time or, if it has no beginning, an infinite time). This is something evidently inexplicable by science.

~~The Existence of God Richard Swinburne~~

Swinburne posits the existence of God as a "brute fact" that simply does not have an explanation. Take it or leave it! It's his hypothesis and he can frame it any way he pleases. God is a person (and only one person), and as a person he has intentions, beliefs, and basic powers (p. 97).

~~An Analysis of Richard Swinburne's The Existence of God~~

God is internally coherent. The Existence of God is concerned with whether the claim is true; it is concerned to assess the weight of arguments from experience for and against this claim, and to reach a conclusion about whether on balance the arguments indicate that there is a God or that there is not. The present book assumes that the

consciousness and moral awareness, and evidence of miracles and religious experience, all taken together (and despite the occurrence of pain and suffering), make it likely that there is a God.

~~The Existence of God: Amazon.co.uk: Swinburne, Richard ...~~

Swinburne's classic attempt to apply Bayes' Theorem to the hypothesis 'God exists' is a masterful example of inductive argument. If the hypothesis succeeds in offering a simpler, more powerful, comprehensive explanation that has the best fit with our background knowledge, then this book provides a powerful argument for the existence of God.

~~The Existence of God by Richard Swinburne~~

The theism supported by Swinburne is the hypothesis that there is one God, who is the creator of the cosmos. According to Swinburne, good God, though having the power to benefit or to harm us, would provide significant freedom and responsibility to his creation, rather than expel evil (Swinburne 262).

~~Richard Swinburne's Arguments on Why God Allows Evil~~

The existence and regular behaviour of material objects provide good evidence for the existence of God, says Swinburne. God made an orderly world to make it suitable as a theatre for humans. He (uncritically) accepts Paley's argument from design: "This analogy of animals to complex machines seems to me correct, and its conclusion justified."

~~Is there a God? (Richard Swinburne).~~

Moral arguments for God's existence form a diverse family of arguments that reason from some feature of morality or the moral life to the existence of God, usually understood as a morally good creator of the universe. Moral arguments are both important and interesting.

Richard Granville Swinburne FBA is an English philosopher. He is an Emeritus Professor of Philosophy at the University of Oxford. Over the last 50 years Swinburne has been an influential proponent of philosophical arguments for the existence of God. His philosophical contributions are primarily in the philosophy of religion and philosophy of science. He aroused much discussion with his early work in the philosophy of religion, a trilogy of books consisting of *The Coherence of Theism*, *The Existence of God*, and *The Value of Theism*.

~~Richard Swinburne - Wikipedia~~

Richard Swinburne makes a cumulative argument in *The Existence of God*, claiming that given considerations like the existence and fine-tuning of the universe, objective morality, consciousness, religious experiences and miracles, God is the best explanation for what we observe in the world.
